NURU CENTER

R.E: CATHERINE [REDACTED]

I wish to certify that the above named student needs scholarship. Her mother is the only person who gives support to her Education, she belongs to a single parent after the death of the father. This is a poor family which needs help. Academically she is doing well, Her behavior is very good. Below is her Annual performance, this year 2011

Term I	Term II	Term III 2011
255	260	276

your faithful
H/T.

I am glad to tell you that, in our home, there are many problems which we have. My mother tries hard in order to educate us. What they are paid in school, she provides school fees for our youngest brother who is in form three and the rest she go and pay for me. We don't have cows but sometimes my mother sells a goat to provide school fees for us.

She also tries to provide us with balanced diet which is for building our bodies. There are some days which we pass without supper. But we ask God to give us food, and because we know God cares for those who are in need, he gives us what to eat. In our home, we have two shambas which provides us with food. That food, we also use it for selling to to be paid school fees. We sell it because of problems which are in our home. If schools are opened, my brother is been sent home because of school fees. When they are sent home, he goes where there is my mother. My mother gives him what she has been collected. And then my brother goes back to school. I have uncles who works in Nairobi. They sometimes send money for us. There is one of them who works in power generation. He sometimes provide my brother with school fees.

I thank God because this year now I am in class eight. From class one up to class eight, my mother educated me without seeking any help from people. Although they are not paid by government, my mother tries hard to educate everyone of us. I also have Aunts who are jobless. They do not provide money for us because are unemployed. So that is why I want to apply for a scholarship.

I want to study hard in order to achieve goals and also improve our home. I want to become a nursing doctor when I grow up. Because I will be carrying out treatments of sick or injured people. In our home, there is a house which is incomplete and I want to complete it after school. Everyday I ask God to help me in achieving that my career. I want to buy a prado when I grow up. I will be driving them up to all the time.

Forwarded for necessary
