

Dear sir/madam,

RE: ASSISTANCE FOR SEC SCH PAYMENT.

I am writing this letter humbly requesting for assistance. I am a fourteen years old girl, I live in a small village called Moto. With my parent and my sister's. I am the second born and yet I am expecting to do K.C.P.E this year.

My elder sister is in Mona secondary school, My mother pays her school fees. My mother does not have a permanent job. She is a casual labourer. We depend on the money my mother earns per day. This makes the work of getting our daily bread hard. My mother provides food for us and also pay's school levies. This make us to sleep without eating. My mother is the bread winner of the house. We depend on her fully. Moreover my sister stays at home for weeks or months because she lacks school fees.

My father is a jobless person. He stays at home. But when he accidentally gets a "kibanda" he goes drinking. He does not provide for house chores.

If I try to remember how it all started after my brother had died this is when my father started engaging himself in smoking and drinking alcohol. He does not like girls. What he wanted was my mother to

have a boy.

Then our house became the worst place to stay in when my younger sister was born. Now my father cannot provide food for us. Because of the hustle and bustle inside the house my performance in education has gone down.

Now I am terrified and confused because my dream or goal of becoming a banker or judge seems that it will not come true. It seems that class eight is the end of my education.

I am working very hard in order to make both ends meet. I would also like to achieve my goals in education. I am requesting you faithfully to help me in order to achieve my goal in education. As you know education is the key of life and without it I would only leave a hollow life. May God bless the work of your hand.

yours faithfully
